

LANDSCAPE FESTIVAL

4TH-20TH SEPTEMBER 2026

Nuovo Rinascimento NUOVO RINASCIMENTO

Landscape design, based on scientific knowledge and cultural sensitivity, is now seen as a tool for environmental and social regeneration.

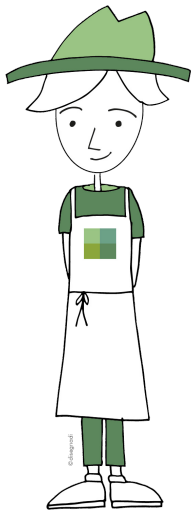

It is time for a new renaissance, capable of steering the transformation of the territory towards more inclusive, natural and biodiverse models. Within this scenario, art, gardens and science converge in spaces that enhance people's well-being and strengthen the resilience of the environment.

The future of the communities and environments in which we live depends on our ability to design landscapes that integrate advanced scientific knowledge, aesthetic quality and ethical responsibility. We are custodians, not owners, of a living system that must be protected, regenerated and passed on to future generations.

with

Jo Wakelin (New Zealand); **Martha Schwartz Studio** (USA); **The Landscape Studio** (East Africa); **Macarena Calvo** (Chile); **Terremoto Studio** (USA); **Martí Franch** (Spain); **Bas Smets** (Belgium); **Emanuele Bortolotti** (Italy); **Alejandro Saralegui** (USA)

The 'International Meeting of Landscape and Garden' symposium is a two-day event dedicated to advanced training and knowledge sharing, during which various architects, landscape architects and plant designers from around the world share their vision and philosophy through the presentation of their projects. It is a unique opportunity for professional growth, networking and discussion with colleagues from every country in an international atmosphere of great enthusiasm.
